It is with great pleasure that the Cheshire Agricultural Society has agreed to host our Society's 2023 National Show at this year's Royal Cheshire Show. We last held the event at the show in 2015 when it was a tremendous success.

Red Poll Cattle

The Red Poll is a traditional native breed which has changed little in nearly 150 years. It is a truly dual purpose breed. It is naturally polled and thrives on lower input management systems as it is an efficient converter of forage requiring little or no additional feed. It is an easy calving docile cow and an excellent mother. Steers and young bulls finish well and produce outstanding quality meat. The Red Poll Cattle Society encourages the use of Red Poll cattle within the livestock industry particularly with the modern emphasis on environmental sustainable systems.

The Society will have a marquee and stand at the show, besides the cattle show rings, so please come and visit us.
